altereo

awakening environmental intelligences®

innovating water utility **GIS**
leading-edge **asset management**
engineering for **high-performance** utilities

Your utility GIS now in *Full-Web* mode

One server

Hundreds of end users

No user installation

Everything in browser

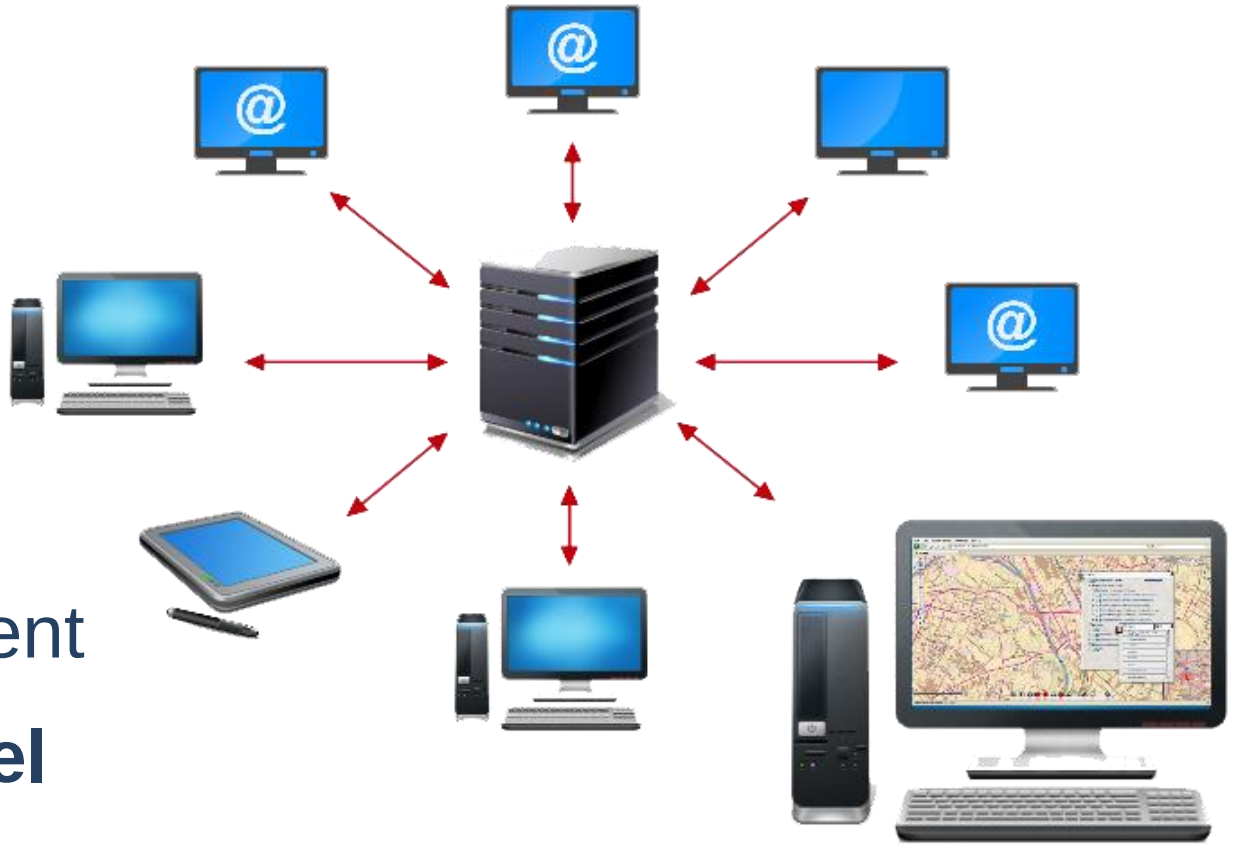

Real-time synced data

Access level management

Water/sewer **data model**

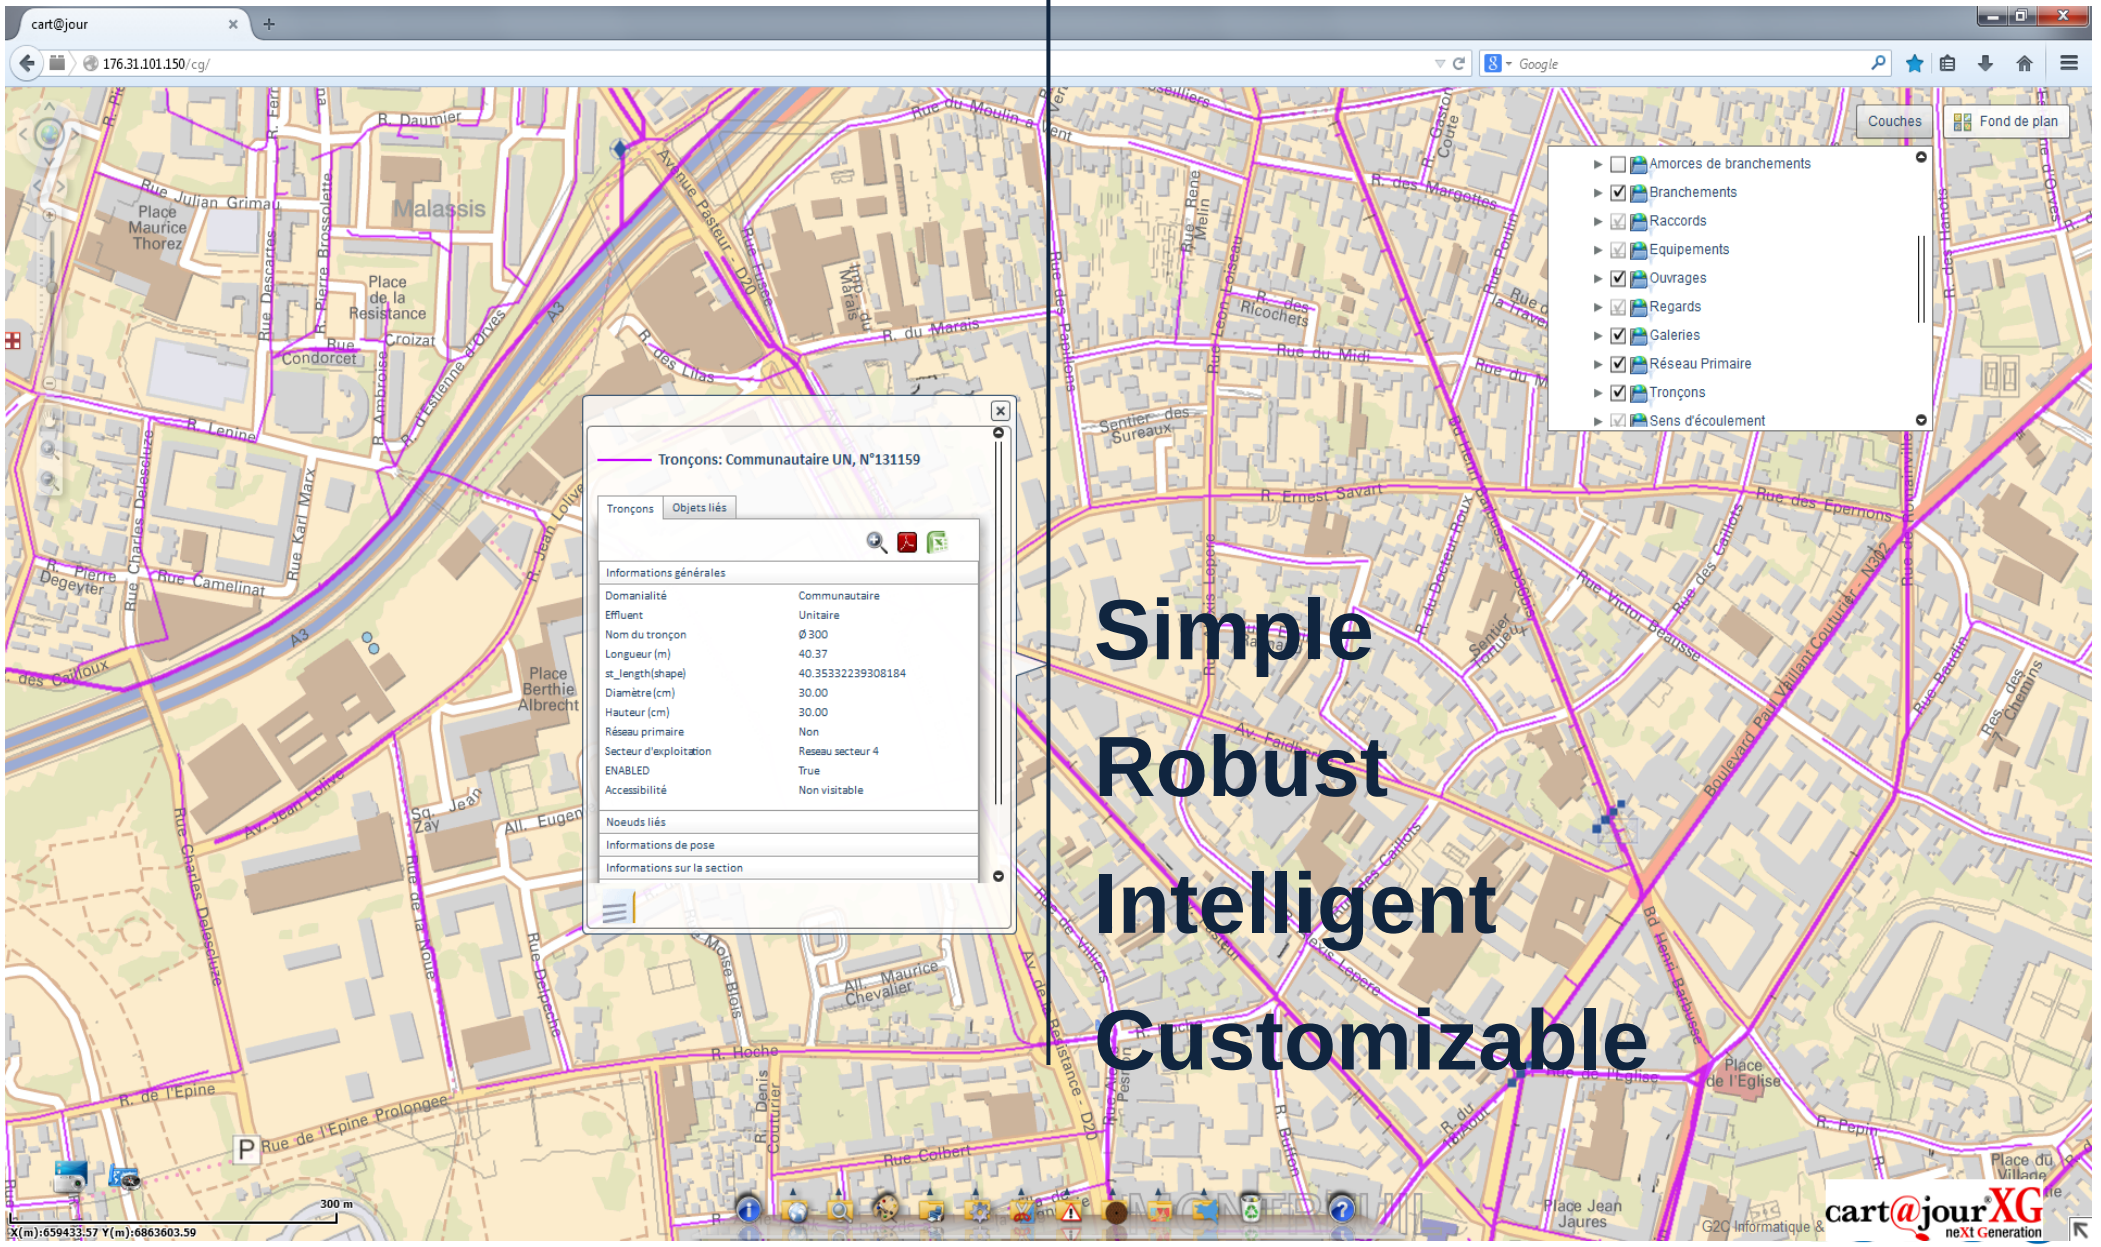

Workflow management

Mobility… and more

altereo

And it looks like this

Choose your environment

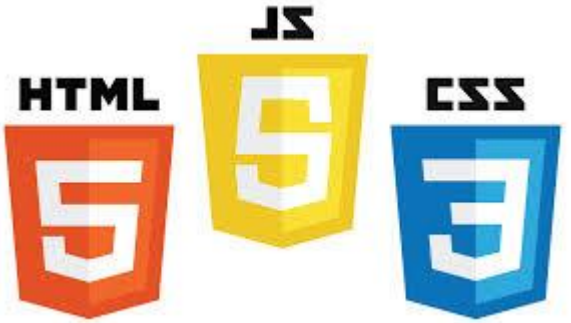

ESRI

World leading technology

OpenSource

Cutting-edge technologies

OpenLayers 3.0

altereo

Customize your workflows

We believe workflows are the key to a successful GIS project at the heart of the utility

Staff involvement at all levels

Proper data capitalization

Foundations for advanced **asset management**

altereo

Go *beyond* traditional GIS!

altereo

Optimized pipeline rehabilitation planning

Your data is *"gold"*

Our expert systems make the most out of it

With SIROCO® and Indigau® expert systems integrating state-of-the-art international R&D presented at

IWA International Water Association

Leading-Edge **Asset Management**

Go *beyond* traditional GIS!

altereo

Optimized pipeline rehabilitation planning

What if you could predict future burst and breaks?

What if you could simulate future impacts?

What if you could align rehabilitation & performance?

Today you can!

With SIROCO® and Indigau® expert systems integrating state-of-the-art international R&D presented at

IWA International Water Association

Leading-Edge **Asset Management**

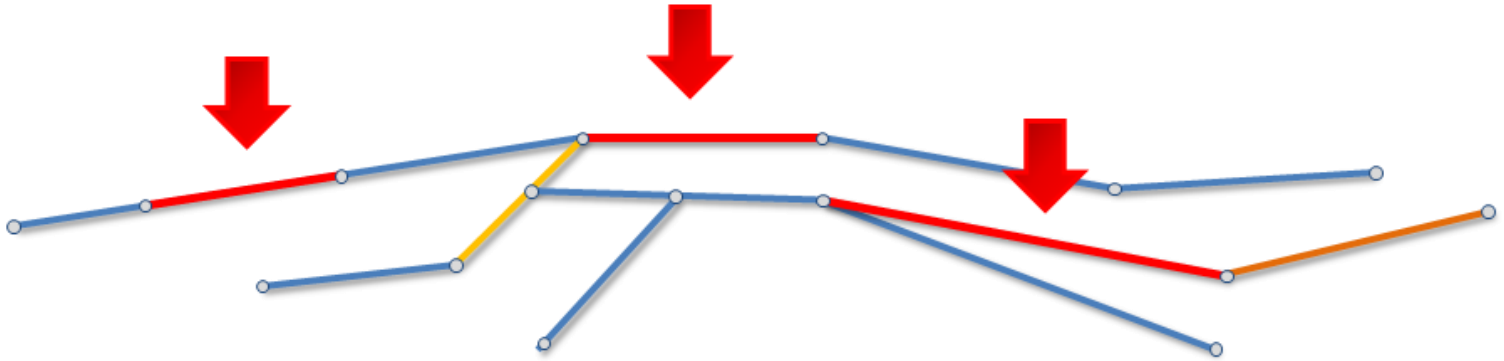

Go *beyond* traditional GIS!

altereo

Optimized pipeline rehabilitation planning

Set your performance objectives, get your rehab plan

With SIROCO® and Indigau® expert systems integrating state-of-the-art international R&D presented at

IWA International Water Association

Leading-Edge **Asset Management**

Reach *high-performance* with our tailored expert assistance

Cartography, GPS

Leak detection campaigns

Hydraulic modelling

DMA design

Pressure management

CCTV auto-interpretation

Staff training/capacity building

Workflow design

Optimized pipeline rehabilitation programs
